SPEAKER SERIES

Building Relationships in Community Engagement through Invitations

April 11, 2023

11 AM - 12PM EST

This session introduces and explores the concept of invitational validity, which is conceptualized as the extent to which decolonizing/co-decolonizing methodology and other methodological frameworks seek to create space for researchers to **engage with Indigenous and marginalized communities** to which they do not belong. Authentic reciprocal friendships lead to invitations to enter spaces that are not organically ours and allow us to **collaborate with communities** regarding the creation of questions and determining the who, how, and why that we seek answers to those questions.
